Veracity: Knowing whether the data that is available is coming from a credible source is of utmost importance before deciphering and implementing Big Data for business needs.

Here is a brief explanation of how exactly businesses are utilizing Big Data:

Once the Big Data is converted into nuggets of information then it becomes pretty straightforward for most business enterprises in the sense that they now know what their customers want, what are the products that are fast moving, what are the expectations of the users from the customer service, how to speed up the time to market, ways to reduce costs, and methods to build economies of scale in a highly efficient manner. Thus Big Data distinctively leads to big time benefits for organizations and hence naturally there is such a huge amount of interest in it from all around the world.
