DEPARTMENT OF ZOOLOGY
REPORT TO IQAC

ACTIVITY : TEDTALK

TOPIC : Hunting of Dinosaurs showed me our place in the universe

SCHEDULE : 19.08.2017.

CLASS : B.Sc. I,III & V Semester

TIME : 04.00 pm to 05.00 pm.

Kenneth John Lacovara is an American paleontologist and geologist at Rowan University and fellow of the Explorers Club, known for the discovery of the titanosaurian dinosaurs.

Lacovara is the founder of the Edelman Fossil Park of Rowan University in Mantua Township, New Jersey and a TED speaker. He is author of the general-audience book, Why Dinosaurs Matter (2017), for which he received a Nautilus Book Award.

Additionally, he serves as Paleontology Fellow of the Academy of Natural Sciences. He is a recipient of the Explorers Club Medal, the highest honor bestowed by The Explorers Club.

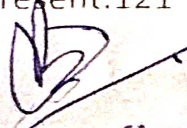

In this video he is talking about, What happens when you discover a dinosaur? Paleontologist Kenneth Lacovara details his unearthing of Dreadnoughtus -- a 77-million-year-old sauropod that was as tall as a two-story house and as heavy as a jumbo jet -- and considers how amazingly improbable it is that a tiny mammal living in the cracks of the dinosaur world could evolve into a sentient being capable of understanding these magnificent creatures. Join him in a celebration of the Earth's geological history and contemplate our place in deep time.

Total number of students present:121
