DEPARTMENT OF ZOOLOGY

REPORT TO IQAC

ACTIVITY: TEDTALK

TOPIC: ANIMAL WELFARE AND THE FUTURE OF ZOOS

SCHEDULE: 01.09.2018

CLASS: B.Sc. I,III,V Semester

TIME: 4.00pm to 5.00pm

Ted talk on topic "Animal welfare and the future of zoos" by Ron Kagan was arranged for B.Sc CBZ students on 01.09.2018 in Seminar hall at 4.00pm.

Ron Kagan is the Executive Director and CEO of the Detroit Zoological Society .An advocate and activist for compassionate conservator and animal welfare, Ron is a leader n environmental and humane education .Over the past thirty years, Ron's career background includes working and consulting for numerous zoos and aquaria. Ron has authored several papers in scientific journals, encyclopedia entries and book chapters on both museum and zoological subjects.

In this TED TALK Ron Kagan shares his views about about future of zoos. He feels that there is a different relationship between human and non-human animals. Zoos will demonstrate a fundamental commitment to being "Patient – centered" that ensures a great quality of life for each animal in a zoo. He will explain challenging responsibility that involves keeping living beings in a captive state or captured condition. He also delivers to fulfill the decade long promise to make the captivity similar to the wild.

REPORT TO IQAC

ACTIVITY: TEDTALK

TOPIC: COMMUNICATION IN PRIMATES

SCHEDULE: 03.02.2018

CLASS: B.Sc. II,IV,VI Semester

TIME: 4.00pm to 5.00pm

Ted talk on topic "Communication in primates" by Anindya Sinha was arranged for B.Sc CBZ students on 03.02.2018 in Seminar hall at 4.00pm.

Anindya Sinha is an renowned Indian primatologist demonstrates the constant evolution in communication patterns in primates and how this gives us a glimpse of how our languages originated and have developed to the levels they are at currently.

He is a professor at the National Institute of Advanced Studies (NIAS) India .He is on the executive board of Nature Conservation Foundation ,India. His research is mostly centered on the field of cognition and consciousness of bonnet macaque (*Macaca radiata*) but he also has been involved in many genetic projects on Indian primates .He is also involved with Biology Olympiad as the leader of the Indian team.

GLIMPSES

In this video he shares his views basically when you think of mind, when you think about communication ,the most fascinating behaviour is that you can think of human language ,this is perhaps one of the important feature that separates non-humans from humans.

S.B.Arts & K.C.P.Sc. College,
VIJAYAPUR.

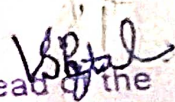

- What is fascinating about human language ?is about Where did it start? How did it evolved –for this it is necessary to study communication system of our non-human cousins in the hope that we can identify the traces of the language that we speak today.
- One of the very important problem that is an extremely difficult problem of studying the non-human communication or mind is the simple fact that they cannot talk to us.
- Communicative signals-speech
- Explains about Intentionality type of communication
- Work on Macaca monkey at Bandipur National Park.
- Explains about the visual and vocal signals in macaca through an additional video.
- Further he explains about the intentionality of food request and referentiality.
- Evolution today –The evolution of novel, Innovative, multi model food requesting behaviour, involving intentional and referential social signals directed by a non-human species towards human alone ,while naturally communicating in wild.

Conclusion-At last conclusion What does it say about human language perhaps the origin of the human language does not go back only to the chimpanzees, great apes as the current belief,the roots of the human language go back much further to the macaca's were they have been able to evolve through their own cognitive capacities the signal which uses vocalization, gestures and has been able to put them together as that to humans.

Total no. of students attended the ted talk session=218
