DEPARTMENT OF ZOOLOGY

NOTICE

It is hereby informed to the students of B.Sc II,IV&VI semester of CBZ combination to attend the organized TEDTALK programme on topic **HOW GENETICS AND ENVIRONMENT WORK TOGETHER TO SHAPE OUR DESTINY** delivered by Milena Georgieva on 15.02.2020 at 4.00 pm in the seminar hall. The science faculty is requested to attend the TEDTALK.

Principal,

S.B.ARTS AND K.C.P. SCIENCE COLLEGE, VIJAYAPUR.
DEPARTMENT OF ZOOLOGY
REPORT TO IQAC

ACTIVITY : TEDTALK

TOPIC : How genetics and environment work together to shape our destiny

SCHEDULE : 15.02.2020.

CLASS : B.Sc. II,IV & VI Semester

TIME : 04.00 pm to 05.00 pm.

Milena Georgieva is a young scientist in Bulgaria with lots of prestigious awards for best scientific excellence practices. Here, she describes the way our DNA functions. The way we live, the way we talk, the way we breathe and the environment is what shapes our destinies and is controlling our genomes.

About half-way through, she explains the comet assay which is used to evaluate genetic damage caused by chemicals such as food dyes or toxins, and she shows the results of three food dyes and their effect on DNA. In response to a request, I have transcribed this section and it can be seen here.

She graduated from the University of Sofia, Faculty of Biology in 2001 and since then have been working at the Laboratory of Molecular Genetics, Institute of Molecular Biology, Bulgarian Academy of Sciences, where she obtained her PhD in Molecular Biology.

In the spirit of ideas worth spreading, TEDx is a program of local, self-organized events that bring people together to share a TED-like experience. At a TEDx event, TEDTalks video and live speakers combine to spark deep discussion and connection in a small group.

No. of students attended =127

DEPARTMENT OF ZOOLOGY
REPORT TO IQAC

ACTIVITY : TEDTALK

TOPIC : Confession of Wildlife Filmmaker

SCHEDULE : 31.08.2019.

CLASS : B.Sc. I,III & V Semester

TIME : 04.00 pm to 05.00 pm.

Discovery, Animal Planet, National Geographic, and the History Channel are failing to put conservation, education, and animal welfare ahead of ratings and profits when producing and airing films on wildlife. I believe it's time for wildlife filmmaking to move in a more ethical direction. Wildlife films should not deceive audiences, harass animals, or avoid conservation.

Video Supervisor: Ford Fischer Filmed by Arun Raman, Delana Listman, and Elaina Kimes Edited by Elaina Kimes and Ford Fischer Recorded in The Harold and Sylvia Greenberg Theatre at American University, Washington, DC Chris Palmer has spearheaded the production of more than 300 hours of original programming for prime-time television and the giant screen IMAX industry, including the Disney Channel, TBS, Animal Planet, Travel Channel, and PBS. Palmer and his colleagues have won numerous awards, including two Emmys, and an Oscar nomination.

He founded the Center for Environmental Filmmaking at American University in 2005, a year after joining AU's full-time faculty as Distinguished Film Producer in Residence. His book Shooting in the Wild has been made into a film for public television, and his new memoir, Confessions of a Wildlife Filmmaker, has just been published.

REPORT TO IQAC

ACTIVITY TEDTALK

TOPIC : THE FASCINATING INTELLIGENCE OF BIRDS

CLASS : B.Sc II,IV and VI Semester

SCHEDULE : 23.02.2019

TIME : 4:00 to 5:00 pm

TEDTALK on the fascinating intelligence of birds by Auguste von Bayern was arranged for the students of B.sc II ,IV ,VI semester zoology students.

Birds are very intelligent creatures to demonstrate this Auguste von Bayern brings Dolhi a jackdaw who is very close to her, on stage to be first corvid ever to appear in the TEDx talk. She goes to explain how certain bird species can innovate, reason and even make novel tools to accomplish their goals.

Auguste von Bayern is a zoologist who seeks to understand how animals, in particular corvids (Birds of the crow family) and parrots think. Her research interest comprises socio-cognitive abilities as well as flexible problem solving skills and vocal learning abilities of these birds. Auguste has been fascinated by wild animals and animal behavior since childhood. Inspired by scientist such as Jane Goodall and Konrad Lorenz, she raised Canadian geese from the egg and studied their behavior from the moment of hatching when she was still at school.
