## A Report On “BUILDING BRIDGE BETWEEN ACADEMY TO CORPORATE”

The guest lecture was organized by BLDEA's S B Arts and K C P Science College, Vijayapur BCA Department, topic was “BUILDING BRIDGE BETWEEN ACADEMY TO CORPORATE” on 5<sup>th</sup> February 2020 at 2.00 pm to 3.00 pm in L.H.No 2 . The resource person was **Mr.Sadanand. Biradar, Senior Test Engineer from Wipro Pvt. 3, Sheldon Square London, UK.**

The guest lecture was commenced with **BUILDING BRIDGE BETWEEN ACADEMY TO CORPORATE**” He explained that Education is a very important aspect of our Life. Education not only makes students better citizens of the world by inculcating values and good habits, but it also helps students to be technically sound so that they can compete with the outside world. Teachers play a dominant role in imparting knowledge to the society and so their teaching methods need to be as effective as possible. The University is also making a lot of efforts to reduce the gap between what academic offers and what industry needs by continuously interacting with Industry people.

He also explained **WHAT ARE THE GAPS BETWEEN ACADEMIA AND INDUSTRY?**

Just as species of Land and that of the sea exhibit different behavior and have a different environment, in the same way people working in Industry and Academia have totally different work culture and environment. Industries and Universities are not working in harmony with each other and that is the reason why there is a huge gap. It is important to recognize those gaps in order to fill them. Following are the various gaps between Academia and Industry:

(1)Curriculum of Universities are not as per the Industry Standards . Curriculum of Universities is more of a theory based rather than application based. Some courses offered by the university are often out-dated.

(2)Interns not getting Proper Working Environment in some Company . The main goal of short term training programs which is a part of the curriculum in many higher education systems was to provide good practical knowledge to students. Students prefer to choose big branded company rather than startups. The kind of experience, students get in startups are much more than they get in big branded companies

(3)Faculties lacking industrial exposure . Faculties fail to teach students the real life applications of various concepts being taught. The professors are more research oriented and they don't know how to make their research into a product which could be commercialized and how to make money out of it.

(4)Process of Evaluations - The process of evaluating the student in academic is based on grades obtained in examination but in corporate, the evaluations is based on performance of the students as per type of projects he has handled and challenges he has faced and overcome.

(5)Skill Gap or Performance Gap or Employability Gap - Students lack in technical skills or soft skills or both. Skill gap can be measured as the difference between what is expected from students and what they perform. It is also sometimes called as Performance Gap or Employability gap.

(5) Skill Gap or Performance Gap or Employability Gap - Students lack in technical skills or soft skills or both. Skill gap can be measured as the difference between what is expected from students and what they perform. It is also sometimes called as Performance Gap or Employability gap.

6) Students have high expectation from Industry in terms of salary, position and timing.

Moreover students have a mindset that getting a degree is sufficient to get them job.

7) Industry people are not seriously involved in updating the curriculum of Academics

Industry people are very busy in meeting their own deadlines of various projects in the company and so they don't get enough time to invest on updating the curriculum of Academics.
