## Student and staff exchange programmes

Student Exchange Programs provide a firsthand life enriching experience to students engaged in such programs when they are visiting a new country by giving in depth exposure to a student of the traditions, different way of doing things thus making the process and learning very exciting. Such early exposure is likely to play a critical role in delicate matters of human resources as well as conflict and resource management in a student's life. The in-depth self-study of the host country helps students enhance interest in various global issues such as the conflicts between the developed and the developing nations and provide exposure to students of the different perspectives and views. Students learn to understand the ethos and value systems which are different for each country. Student Exchange Programs help erase superficial stereotype images that one generally have of a specific country/culture, bridges gaps through various interactive intercultural communications by understanding different viewpoints and cultural values between the native and host country. These exposures enrich a participant's experiences thus exploiting opportunities, mitigating conflicts and thus gaining the maximum ROI for the companies that these individuals later work for the universities offering exchange programs benefit from these programs too as they become more visible and develop aspiration quotient. The partnership with premiere higher education providers around the world increases their threshold, improves the quality of content of their programs and in some cases attracts exot

instructional staff, thus enriching the professional dimension of the institution as a whole. These universities through such programs can restructure their business potential and exploit the true potential of their programs by providing quality learning in multi dimensions and disciplines thus facilitating better placements to its students. The institution offering such programs also benefit from the reciprocal technology exposure to students that are available in developed countries as the home students who undergo such experience, benefit from it and their narration of these at home class also benefits others and adds to the value offered by the parent institute.

#### **Academic benefits**

- Enhance the value of your degree
- Learn a new language or improve your language skills
- Opportunities to work with researchers in your field
- Build ties with leading universities worldwide
- You can take courses related to your degree which are not available
