## **BLDE** Association's S B Arts and K C P Science College, Vijayapur.

Department of M.Sc.Computer Science

Date: 19/11/2021

## NOTICE

It is hereby inform to all the M.Sc(CS)- III Semester students to attend Webinar on 20-11-2021 at 9:30am in M.Sc. CS Lab.

Topic: "Cyber Security and Compliance with UBUNTU".

Co-ordinator M.Sc. (C.S.) Programme

S.B.Arts & K.C.P.Science College, Vigaryageur

IQAC, Co-ordinator S.B.Arts & E.C.P.Science College, Valencespaler.

# BLDEA's S B Arts and K C P Scinece College, Vijayapur. Department of M.Sc. (Computer Science)

## A WEBINAR REPORT

## ON

# Cybersecurity & Compliance with Ubuntu

Time: 9:30 to 10:30

Date:19/11/2021

# Title: Cybersecurity & Compliance with Ubuntu

Cybersecurity's state of affairs today can be described as too complex. The average IT team faces an enormous number of threats, ranging from "social engineering" attacks to the exploitation of obscure software vulnerabilities. At the same time, the result of data breaches can be severe: operations were disrupted in a pipeline company, while a telecommunications company hack exposed the private data of 50 million customers. Regulators and customers expect more, and sectors that manage critical infrastructure such as healthcare, banking, digital infrastructure and services, water supply, energy, and several others are held to high security standards. The EU's NIS2 directive, or the US' executive order on cybersecurity demonstrate that the direction is clear. Critical infrastructure needs to be deployed and maintained securely for its lifetime, and Canonical's Ubuntu is well positioned to provide the foundation of a successful cybersecurity program.

#### This webinar:

- Provides an introduction to cybersecurity and zero trust.
- Highlight the common challenges faced in the implementation of cybersecurity programs, including challenges in vulnerability management, secure configuration of software and defenses against malware.
- Discuss how Canonical and Ubuntu can help manage these challenges and lay the foundation of a successful cybersecurity program. Presented by Nikos Mavrogiannopoulos, PhD, Product Manager; Lech Sandecki, Product Manager; Jonathan Sackett, Engineering Manager.

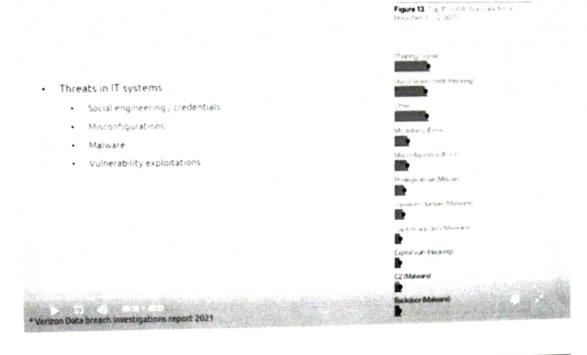

Presentation preview:

## Roadmap

- Why are we discussing cybersecurity?
  - Regulations / Critical infrastructure
- What is cybersecurity?
- Challenges in improving cybersecurity
- Benefits of improving cybersecurity
- How Canonical and Ubuntu can help

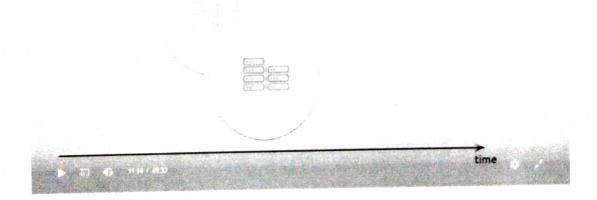

# Why are we discussing cybersecurity?

- Regulation
  - EU with NIS/NIS2, cybersecurity act. Healthcare, Banking. Digital infrastructure & services, Water supply.
     Energy
  - US with NIST cybersecurity framework, executive order state regulations.
- Self-regulation (market pressure)
  - · Companies see the need to secure their supply chains and infrastructure
    - Solar winds supply chair threakage attack disrupted operations. A Crisi final, 1873 (25) (26)
    - Companies that take extral objected unity of epinediscle disercises of getting backed.

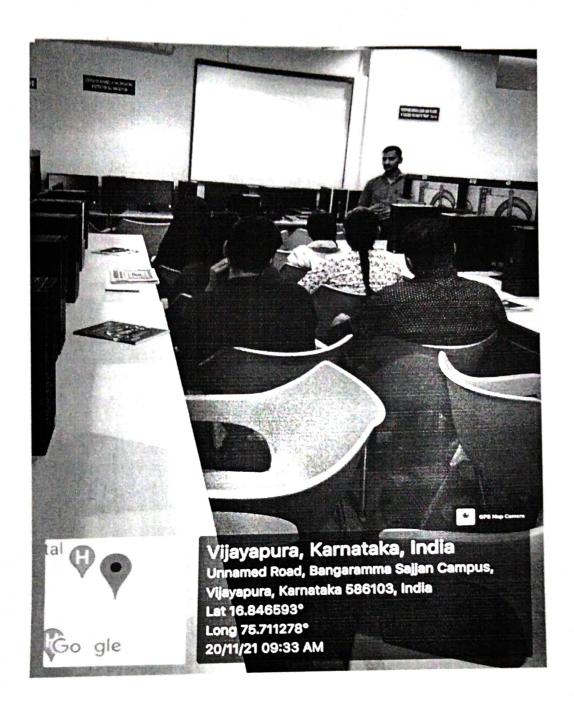

# From perimeter to zero trust

Data Centers perimeter
