### **TED Video 1: "New Brain Computer Interface Technology"**

As mentioned in the video topic, the video content mainly reveals the growth of technology in higher extent. This has took the human brain interaction state which translate the one human brain thoughts and ideas to another whichever needed. This is the great invention made by the CS field which was only left to cross the extent of reality.

Along with human idea, feelings, memories and once experience in his/her own life can also be sent to the other brain to make them experience about unexpected things!

This is all done by small chip, which can copy all the activities done inside the brain. This chip can get inserted into any other brain or get transfer the data by using another human brain chip. This was initially experimented in the rat and monkey. This worked well and given the expected results to the software developers.

Even this can help to recover the state of handy-cap patient in such way that the chip operates and give instruction to the brain to make moment of dead leg or hand wherever however necessary. Everything comes under control of the chip by the human brain and chip to the body parts.

This is a miracle in the science which makes impossible to possible.

### **TED Video 2: "Moral Video: How to get Success in life"** by, Sandeep Maheshwari"

Sandeep Maheshwari is a name among millions who struggled, failed and surged ahead in search of success, happiness and contentment. Just like any middle class guy, he too had a bunch of unclear dreams and a blurred vision of his goals in life. All he had was an undying learning attitude to hold on to. Rowing through ups and downs, it was time that taught him the true meaning of his life.

With his great experience, he presented many ted talks to the youth to be strong, bold and get success in their life with many tips and life skills. One among them we presented to students.
