VALUE ADDED COURSE ON FOOD AND NUTRITION

Course outcome

Department of chemistry conducted Value added course for BSc-I sem students on Food and Nutrition for the academic year 2019-20. The duration of the certificate course is 30 hrs. Theory and practical classes were conducted for 50 students who have enrolled their names for the course.

Food and Nutrition is a programme that includes various aspects of nutrition and health. It gives an understanding of mechanism in human beings, animal and other relevant organisms.

The course concentrates on three areas: food science, technology and analysis, Food Safety, quality and nutrition. There are many exciting opportunities to take on placements. Students can become a nutritionist and help the society to lead healthier lives through education in food and nutrition or enhance their mental and physical performance through specially designed diets.

They can become a food analyst or work in public health and look at the chemical and physical properties of food or conduct tests for bacteria and diseases depending on what future career path students choose, our food and nutrition course could help them get there.

VALUE ADDED COURSE ON FOOD AND NUTRITION

Course outcome

Department of chemistry conducted Value added course for BSc-II sem students on Food and Nutrition for the academic year 2019-20. The duration of the certificate course is 30 hrs. Theory and practical classes were conducted for 50 students who have enrolled their names for the course.

Food and Nutrition is a programme that includes various aspects of nutrition and health. It gives an understanding of mechanism in human beings, animal and other relevant organisms.

The course concentrates on three areas: food science, technology and analysis, Food Safety, quality and nutrition. There are many exciting opportunities to take on placements. Students can become a nutritionist and help the society to lead healthier lives through education in food and nutrition or enhance their mental and physical performance through specially designed diets.

They can become a food analyst or work in public health and look at the chemical and physical properties of food or conduct tests for bacteria and diseases depending on what future career path students choose, our food and nutrition course could help them get there.
