DEPARTMENT OF EDUCATION  
GUEST LECTURE - REPORT

**Rimemory in students**

Human memory, like memory in a computer, allows us to store information for Lateruse in order to do this,however, both the computer and we need to master three Processes involved in memory. The first is called encoding the process we use to Transform information so that it can be stores.For a computer this means Transforming the data into a meaningful form such as an association with Association with an existing memory, an image , or a sound You can't talk about remembering without mentioning its counterpart. It seems that as much as do remember , we forget even more.
