Report on One –Day International Webinar

Dated: 7th November, 2020

The Internal Quality Assurance Cell (IQAC) Initiative, Department PG Studies in Physics of BLDE Association's S. B. Arts & K. C. P. Science College, Vijayapur had organized the One - Day International Webinar on the topic, "Nanomaterial and Its Energy Applications" on 7th November, 2020. The Webinar Commenced with Smt. Soumya Sajjan and Smt Shahanaz Nadaf Dept of Physics Welcomed and Introduced the Guests.

The webinar platform is on google meet you tube live. The workshop had more than 333 viewers studrnrs and different colleges facultys are participated in this International webinar. The webinar was arranged totally three technical sessions with much experienced resource persons.

The First Technical Session Resource Person was **Dr.C.H.Bhosle**, Dept of Physics, Sanjay Godawat University, Kolaphur delivered his Talk on the topic "**Solar Energy Assisted Purification of Water using Nanocrystalline Stratified Transition Metal Oxide Semiconductor Thin Films**"

The Second Technical Session Resource Person was Dr. Rajashree M. Hodlur, Department of Physics, KLE Technological University, Hubballi delivered his Talk on the topic Semiconductor Nanostructures: Colloidal Synthesis and their Applications.

The Third Technical Session Resource Person was **Dr. Rafiq Mulla**, Postdoctoral Researcher Energy Safety Research Institute, Swansea University, UK delivered his Talk on the topic **Thermoelectric Effects: Applications and Challenges**

The International Webinar is succefully ended with vote of thanks by Prof. R.D Joshi Dept of Computer Science.

→ **Objectives of the Webinar**

World energy consumption largely relies on the combustion of fossil fuels. However, the traditional way is neither sustainable nor environmentally benign. Renewable energy generation devices, such as solar cells, thermo-electronic devices, are widely investigated to replace fossil fuels. Nanomaterials have played an essential role in developing novel energy generation devices. Energy has been the cornerstone of sustainable development of our economy and society. Thus, research is appealing worldwide to diminish the negative environmental consequences of energy consumption. This includes energy saving, generation, harvest, conversion, and storage. Nanomaterials and nanostructures provide unique mechanical, electrical, and optical properties and have played an important role in recent advances in energy-related applications.
